EQUIPMENT INFORMATION

From the start of Production House, we have wanted to create more than a booking venue, but a space that supports the community. In our space clients will find a variety of equipment, props, and tools to assist them with their booking that is available on set, along with the option to rent equipment to elevate your project.

from big to small we have everything.

As creatives ourselves who have utilized other spaces in the past, we thought of the many big and little things creatives would want easily ready in a space, plus some extras. This came in the form of providing an extensive array of toiletries, extension cords, paper and linen backdrops, c-stands, and even large equipment such as high-end lighting and softboxes that can be included in your booking.

If there is ever something lacking during your time with us or not provided you believe the space needs we will be more than happy to make that accommodation a reality, to the best of our availability.

There is a steamer located near the beauty station and a standing mirror that is there for use during your booking.

There is also a large wardrobe rack located near the front of the studio by the steamer, and a secondary wardrobe rack located in the bathroom. Hangers can be found in the bathroom on the secondary wardrobe rack. If you need extra hangers for the day please let our concierge know.

Please ensure the steamer is unplugged prior to your leaving.
